Sprint #1 Planning Document

Overview

This document lists all of the user-stories, their corresponding specific tasks, and the amount of non-distracted work-hours that we estimate each task will take to complete.

User Story	Task	Work Hours (est)
"As a user I want to be able to log into the website and create posts associated with my account"		
	Create server architecture to handle posts	10
	Create server architecture to handle users and redirect unauthorized requests to the main page	15
	Design the plan for the website's appearance as well as what pages should be present in the final product to make writing the html and database models easier	8
